Java Backend Developer — Spring Boot — Microservices — REST APIs

PROFESSIONAL SUMMARY

Java Backend Engineer with 3+ years of experience designing, developing, and supporting enterprise backend applications using Java, Spring Boot, Microservices, REST APIs, MySQL, and PostgreSQL. Experienced in building scalable backend services, resolving production issues through Root Cause Analysis, and delivering features across the full software development lifecycle. Strong background in API development, database design, CI/CD pipelines, Agile delivery, and production support for customer-facing systems.

KEY ACHIEVEMENTS

- Designed and delivered 15+ production REST APIs supporting service provisioning and operational workflows for a live optical networking platform.
- Resolved recurring production incidents through Root Cause Analysis across application, database, and deployment layers, improving platform stability and reducing support escalations.
- Automated deployment activities using Jenkins and Shell scripting, reducing manual release effort and improving deployment reliability across environments.

PROFESSIONAL EXPERIENCE

Senior Software Engineer September 2022 – Present

LTM, Bengaluru

- Developed and enhanced backend microservices and REST APIs powering a live optical networking platform supporting service provisioning, network configuration, and operational workflows.
- Built scalable data access layers using Spring Boot, Spring Data JPA, Hibernate, MySQL, and PostgreSQL to support high-volume transactional workloads.
- Investigated and resolved production issues involving APIs, database performance, and deployment pipelines through structured Root Cause Analysis.
- Automated deployment and release activities using Jenkins, Maven, Git, and Shell scripting to improve release consistency and operational efficiency.
- Collaborated with cross-functional teams in Agile environments to deliver features, troubleshoot defects, perform code reviews, and support production releases.
- Utilized GitHub Copilot and Cursor AI to accelerate development, debugging, and code maintenance activities.

TECHNICAL SKILLS

Programming Languages: Java, Core Java, Java 8+

Backend Technologies: Spring Boot, Spring REST, Spring Data JPA, Hibernate, Microservices

API Development: REST APIs, API Integration, Postman

Databases: MySQL, PostgreSQL, JDBC, JPA

DevOps CI/CD: Jenkins, Maven, Git, GitLab, Shell Scripting

Operating Systems: Linux Basics, Windows

Development Practices: Agile, Scrum, SDLC, Code Reviews, Debugging, Troubleshooting, Root Cause Analysis

AI Development Tools: GitHub Copilot, Cursor AI

EDUCATION

Bachelor of Engineering (B.E.) – Electronics Instrumentation Engineering

Ramaiah Institute of Technology, Bengaluru 2022

CERTIFICATIONS

AI For Developers With GitHub Copilot, Cursor AI Udemy Issued: May 2026
